

# TOKO TELO

## MAHAMASA-NAHANDRO

ASPIRE Consortia experience:  
How can we strengthen health-environment  
partnerships to maximise impact for coastal  
communities?

# INNOVATIVE APPROACHES TO STRENGTHEN H-E PROGRAMMING AND CLIMATE RESILIENCE

*MADAGASCAR PHE NETWORK*

Nantenaina Andriamalala  
Madagascar PHE Network Coordinator

# THE MADAGASCAR POPULATION HEALTH ENVIRONMENT (PHE) NETWORK

National learning network established in 2014 to connect, support and inspire its members to implement cross-sector initiatives that improve the health of both people and the environment.

Bringing together health and environmental NGOs to create high quality, rights-based PHE partnerships

Engaging policy makers to create supportive policy for PHE uptake

Providing a forum for training and exchanging learning / best practices

# HEALTH - ENVIRONMENT THEORY OF CHANGE

Increase access to and quality of health services, remove barriers to uptake of health services

Create opportunities and incentives for livelihood diversification and local marine management

Engage men, women and youth in integrated community outreach / gender-responsive programming

Collaborate closely with community members and groups, build their skills

# Integration of climate change, resilience, conservation and SRHR programming under ASPIRE project

## Activity:

Mapping of biodiversity, conservation, climate change impact and SRH services.

Capacity Building Package

Co-design workshop on integrated messages around Climate Change and SRH.

Cross-training material workshop

# Individual interviews with key informants from organisations

# Reaching last mile communities?

## Challenges:

Isolated places

Lack of infrastructure

Most vulnerable

Insecurity

Medial channel limit

## Likely innovative actions:

Use of drône to deliver medication

Use of Side by Side Vehicle

Collaboration with private sectors

# Recommendations

1. Improve organizations' understanding of the added value of the integrated approach
2. Highlight the work already done; use and optimize the already existing resources of organizations in the sector
3. Analyze the population and its context to adapt interventions and programming
4. Strengthen the added value of the integration process between organizations and in interventions.
